

BRe³ PERFORMANCE BOOST CULTIVATOR CHALLENGE 2019

LIMITED TIME OFFER*: BioRadiance Grow Science is registering up to 100 professional cultivators for the BRe³ Performance Boost Challenge 2019, through October 31, 2019.

Go to www.bioradiance3.com/Challenge and register today. Do not miss out on the incredible pricing benefit of the BRe³ Wand, with added offer to qualified cultivators through all next year. This unique offer is designed to generate maximum yields from your cannabis plants while growing under our “Performance Boost” BRe³ Wands. With the Wand, you can expect an increased yield and simultaneous powerful powdery mildew pathogen control.

BRe³ WAND = CLEANER, STRONGER, HEALTHIER CANNABIS = QUICK ROI = INCREASED \$\$\$ PROFIT

- Accelerated clone propagation and plant growth
- Reduced mortality rate of clones achieved of 50% to almost no failures
- Yield increases up to 35%
- THC increases up to 10%
- Naturally destroys mold and powdery mildew
- Financial ROI payback 1 to 2 grows; warranties life for 5years or 20+ grows

The Wand’s wavelengths are a part of the sun’s spectrum, we are not UV and therefore safe light energy! BRe³ energy has consistently helped cannabis growers across the US and Canada to **supercharge their plants** and achieve their most productive yields. Multiple professionals case studies and testimonials are available on our website at www.bioradiance3.com.

UNIQUE CULTIVATOR PROGRAM:

To ensure you achieve a better yield, our teams will work together on proper installation of the Wands over the clone or veg stage and establishing standards for your controlled grow study. If you are battling with powdery mildew or other pathogens, let’s talk when you register so that we can maximize the pathogen killing of our Wand for your grow. The Wand is designed to be installed alongside your existing grow lights. The Wand is not a grow light, but its light energy supplements and boosts your grow system. The Wand is very easy to install and uses high efficiency LED emitters that require only 22W to operate, delivering highly focused energy.

TERMS AND CONDITIONS:

*Limited Offer: Through October 31, 2019, the First 100 Registered Cultivators will qualify to purchase a master pack of eight (8) BRe³ Performance Boost Wands for \$1600, which is a deep discount price of **\$200 per Wand (or 50% discount from single BRe³ Wands MSRP of \$400)**. Once you’ve received your Wands, we’d like you to start the study with your very next grow cycle.

The Performance Challenge Growing Period will be through April 30, 2020. All results must be submitted by Registered Participants on or before this date. This is a simple program whereby you must submit (a) high quality photo or video images and testimonials via your smart phone at three designated stages of your growing cycle, (b) deliver these images and testimonials to BioRadiance for us to post pre-agreed results from your installation through to test completion that will be shared across the BioRadiance network and social media, and (c) share with us the grow light brand and model that you will be using.

Once your results have been submitted, you then benefit further, as you qualify to purchase additional BRe³ Wands for the same low challenge price of \$200 through all of 2020 and you will receive a \$10,000 voucher towards a \$50,000 purchase of Independence LED Grow Lights.

Your results and findings including our joint analysis of your customized ROI will be collated and shared across the BioRadiance Grow Science network and may otherwise be used for future marketing materials and campaigns, anonymously at your request.
